Stack S PP_CU Chair

design Martini & Dall'Agnol, 2023

Stack stackable chair with four-legs base in polypropylene with shell upholstered in hide.

Stack chair is made up of two elements: base and shell that join without screws, easy to ship and easy to assemble, compact and stackable hypothetically to infinity.

It is possible to configure Stack in two different colors for base and shell, creating colorful combinations.

The shell, in addition to the polypropylene version, is available in wood, upholstered in fabric, leather, faux leather or hide. Also available only with the upholstered seating version.

If configured with a polypropylene base and seat, the chair is suitable for outdoor use.

Materials Certifications

Polypropylene

Polypropylene is a resistant, non-toxic, odorless, heat resistant and easy to clean plastic material. It is also suitable for outdoor use. Our polypropylene is a material reinforced with glass fiber: an option with excellent mechanical properties that allows the product to be solid and resistant. This material has a marked resistance to fading: a treatment with UV stabilizer and AS antistatic protection works to prolong the beauty of the product by slowing the fading process. However, by exposing the chair to the sun and atmospheric agents for very long periods, the color can undergo alterations. As a thermoplastic material, it is 100% recyclable.

CLEANING AND MAINTENANCE

Polypropylene seats are easy to clean, and do not require the use of specific products, except in the case of stubborn and hard to remove stains. For simple and effective cleaning, use a microfiber cloth soaked in water or a solution of water and neutral soap. In case of stubborn stains, it is possible to act directly on them with a neutral detergent, always with the help of a microfiber cloth. Then rinse with water. Avoid abrasive sponges, stain removers and granular cleaners that could scratch the surface. If using a chlorine-based cleaner, rinse and do not dry in direct sunlight.

These tips are cleaning recommendations and do not guarantee complete stain removal.

We recommend that you always test the cleaning method on a hidden part of the item to check the resistance of the material.

Materials Certifications

Hide

FIRE RESISTANCE:
CLASSE 1IM
BS 5852 1-2

Hide is hygienic and practical, wear resistant and breathable. It is obtained from skin of cattle raised for food purposes, and subsequently treated with chromium salts. Any imperfections on the hide surface are a natural feature that guarantee its originality.

CLEANING AND MAINTENANCE

Dust the surface regularly, with a dry and soft cloth. In case of stains, use only a non-abrasive damp cloth, and gently rub the area by moving the cloth in a circular direction starting from the edges of the stain towards the center. We recommend to act promptly: a delay could compromise the cleaning result. Do not use products that contain solvents or alcohol since they can damage the surface. Dry immediately after treatment. For a good conservation of the product, avoid direct sunlight, that can alter its characteristics and color, as well as exposure to heat sources.

We recommend that you always test the cleaning method on a hidden part of the item to check the resistance of the color. These tips are cleaning recommendations and do not guarantee complete stain removal.

Colour samples are to be considered approximate for each product. Slight color differences between a lot and the other are to be considered normal.

Materials Certifications

Tuscan hide

TYPE: NABUK TUSCAN HIDE

Nabuk Tuscan hide is obtained by working on the external part of the animal's skin, the fiore part. The surface is polished by using specific machinery, with the aim of obtaining a soft and velvety surface. Nabuk is a very fine hide, as only the best leathers are suitable for this type of processing, but at the

same time it must

be carefully maintained. Small imperfections on the surface guarantee its originality and naturalness, and are not to be considered manufacturing defects. This material is not water repellent and fears humidity. To maintain the beauty of the original color, avoid putting the Nabuk Tuscan hide into contact with water or any other liquid. Absorption of liquid can lead to an alteration of the finish.

TYPE: FIORE TUSCAN HIDE

Fiore Tuscan hide is a high-quality natural material, and softness is its main feature. Hide is not afraid to show the signs of time, that contribute to make it a unique product. Possible imperfections such as scratches, scars or stains on its surface are a natural feature that guarantee its originality and quality. This material is not water repellent and fears humidity. To maintain the beauty of the original color, avoid putting the Fiore Tuscan hide into contact with water or any other liquid. Absorption of liquid can lead to an alteration of the finish.

CLEANING AND MAINTENANCE

Hide is a fine and durable material, but still needs special attention. Do not directly expose it to light or heat sources, in order to preserve its characteristics. Avoid damaging the surface with sharp objects. To clean it, use a soft brush such as those commonly used for clothing. Alternatively, it can also be used a soft and dry cloth. Do not use specific liquid products or conditioners to clean the hide.
